-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2000.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. This action is responsive to communication: original application filed
11 December 2000.

2. Claims 1-24 are currently pending in this application. Claims 1, 10, 17, and 22 are
independent claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the
basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language

4. **Claims 1-24** are rejected under 35 U.S.C. 102(e) as being anticipated by Stoltz
et al. U.S. Patent No. 6,615,264 (hereinafter '264).

**As to independent claim 1, "A method to enable tracking of a network
device capable of communicating over a network, comprising: receiving
information identifying a user over the network; receiving an asset identifier of
the network device associated with the user; and associating the user identifying
information with the asset identifier"** is taught in '264 col. 3, lines 6-31.

As to dependent claim 2, “wherein receiving the user identifying information comprises receiving user login information” is shown in ‘264 col. 3, lines 13-16.

As to dependent claim 3, “wherein receiving the asset identifier comprises receiving at least one of an asset tag, an identifier of a processor in the network device, and a serial number of the network device” is disclosed in ‘264 col. 8, lines 17-44.

As to dependent claim 4, “further comprising storing the associated user identifying information and asset identifier in a table” is taught in ‘264 col. 9, lines 65-67.

As to dependent claim 5, “further comprising receiving a request to track the network device and accessing the table to extract one of the asset identifier or the user identifying information” is shown in ‘264 col. 15, lines 23-56.

As to dependent claim 6, “wherein the table contains plural asset identifiers associated with plural network devices, and wherein accessing the table comprises accessing the table to extract one of the plural asset identifiers” is disclosed in ‘264 col. 11, line 55 through col. 12, line 48.

As to dependent claim 7, “further comprising: receiving information identifying a second user; receiving an asset identifier of a second network device associated with the second user; associating the second user identifying information and the second network device asset identifier; and storing the

second user identifying information and the second network device asset identifier in the table” is taught in ‘264 col. 11, line 55 through col. 12, line 48.

As to dependent claim 8, “wherein receiving the asset identifier comprises receiving the asset identifier from a database in a management server” is shown in ‘264 col. 11, line 55 through col. 12, line 48.

As to dependent claim 9, “wherein receiving the asset identifier comprises receiving the asset identifier from the network device” is disclosed in ‘264 col. 8, lines 17-44.

As to independent claim 10, “A system for use on a network, comprising: a storage unit containing a table storing asset identifiers of network devices and information identifying users of the network devices; and”is taught in ‘264 col. 11, lines 55-68;

“a controller adapted to update the table when users log onto the network” is shown in ‘264 col. 10, lines 5-8.

As to dependent claim 11, this claim is substantially similar to claim 2 and is rejected along the same rationale.

As to dependent claim 12, “wherein the controller is adapted to receive an asset identifier of a network device associated with each user during a login procedure” is shown in ‘264 col. 3, lines 6-31.

As to dependent claim 13, “wherein the controller is adapted to store a time indication in the table to represent time of usage of a network device by each user” is disclosed in ‘264 col. 7, lines 23-31.

Art Unit: 2134

As to dependent claim 14, "wherein the time indication comprises a time stamp created during a login procedure by each user" is taught in '264 col. 7, lines 23-35.

As to dependent claims 15 and 16, these claims are substantially similar to claims 3 and 5; therefore they are rejected along the same rationale.

As to independent claim 17, this claim is directed to a storage medium containing instructions of the method of claim 1 and is rejected along the same rationale.

As to dependent claim 18, "wherein the instructions when executed cause the system to further associate the user identifying information with network access time and date information" is shown in '264 col. 7, lines 23-31.

As to dependent claims 19, 20 and 21, these claims are substantially similar to claims 4, 6, and 2; therefore they are rejected along the same rationale.

As to independent claim 22, "A data signal embodied in a carrier wave and containing instructions that when executed cause a system to: store, in a storage device, asset identifiers of network devices and associated information identifying users of the network devices" is disclosed in col. 11, lines 55-68;

"receive, from a node, a request for identifying a user of a first network device; and" is taught in col. 3, lines 3-61;

"communicate the user identifying information associated with the first network device to the node" is shown in col. 12, lines 1-48.

As to dependent claim 23, this claim is substantially similar to claim 5, and is rejected along the same rationale.

As to dependent claim 24, this claim is substantially similar to the combination of claims 4 and 5 and is rejected along the same rationale.

Conclusion

5 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
